HEALTH CENTRE,

MARKET STREET,

KETTERING,

June, 1939.

To the Chairman and Members of the Desborough
Urban District Council.

MR. CHAIRMAN, MRS. BOSWORTH AND GENTLEMEN,

I have the honour to present my Annual Report on the Health and Sanitary Conditions of the Urban District for 1938.

I would like to thank the Public Health Committee, the Clerk, Mr. Tyldesley, and the Sanitary Inspector, Mr. Harris, for their help and co-operation during the year.

I am,

Your obedient servant,

THOMAS O. GARLAND,

Medical Officer of Health.

SUMMARY OF VITAL STATISTICS.

The following is a summary of the principal statistics for the years 1934, 1935, 1936, 1937, 1938.

	1934.	1935.	1936.	1937.	1938.
Area (acres)	2400	2400	2400	2400	2400

The chief occupations of inhabitants are as follows:—Boot and shoe manufacture, corset manfacture, manufacture of cardboard boxes and rigid containers, ironstone quarrying, farming.

EXTRACTS FROM VITAL STATISTICS FOR THE YEAR.

LIVE BIRTHS.		TOTAL.	MALES.	FEMALES.
Legitimate		54	28	26
Illegitimate	•••	2	1	1
	Totals	56	29	27

Birth-rate per 1,000 of the estimated population 12.74 STILL BIRTHS.

TOTAL. MALES FEMALES.
5 2 3

Rate per 1,000 total (live and still) births 81.97

•			
	TOTAL.	MALES.	FEMALES.
Deaths	4 6	22	24
Death-rate per 1,000 of the e	stimated	resident	
population	•••	• • •	10 89
Deaths from Puerperal cause	es:—		
Puerperal Sepsis	• • •		nil
Other Puerperal Causes	•••	•••	nil
Rate per 1.000 total (live a)	nd still)	births	nil

Death-rate of infants under one year of age:-

All infants per 1,000 live births	71.43
Legitimate infants per 1,000 legitimate live births	55.56
Illegitimate infants per 1,000 illegitimate	33 30
live births	500.00
Deaths from Measles (all ages)	nil
,, ,, Whooping Cough (all ages)	nil
,, ,, Diarrhœa (under two years	
of age)	nil
Cancer	6

As compared with the year 1937 the death rate is higher by 0.72 per 1,000 of the population, and the birth rate is lower by 0.91.

The birth rate exceeds the death rate by 1.85 per 1,000 of the population.

The number of deaths registered was 46, of which 22 were males and 24 were females.

The crude death rate per 1,000 of the population was 10.47 which, multiplied by the comparability factor, 1.04, supplied by the Registrar-General, gave a corrected death rate of 10.89 as compared with 11.6 for England and Wales. This death rate of 10.89 is the rate which, it is assumed, would be arrived at if the age and sex constitution of the population of Desborough were distributed in the same proportion as that of England and Wales as a whole.

The registered causes of death were as follows:

		M	17	m

SECTION B.—General provision of Health Services for the area.

The Medical Officer of Health acts in a similar capacity for Burton Latimer Urban District, Rothwell Urban District and Kettering Rural District and is, in addition, Assistant County Medical Officer.

The office of Sanitary Inspector and Surveyor is a joint appointment and the officer is a member of the Institute of Municipal and County Engineers and of the Royal Sanitary Institute.

(a) Laboratory facilities.

Chemical and bacteriological examinations are undertaken by the Clinical Research Association, Limited, London, and at the County Public Health Laboratory and at the Northampton General Hospital Laboratory. The following specimens were examined:—

Swabs	(for	Diphtheria)	1
Blood		• • •	3
Faeces			1

(b) Ambulance facilities.

Infectious cases are removed by a motor ambulance stationed at the Isolation Hospital in the Kettering Borough, and non-infectious and accident cases are removed by ambulance under the efficient administration of the St. John Ambulance Brigade.

(c) Nursing in the Home.

- (1) General.—The Desborough Nursing Association affiliated to the County Nursing Association makes the services of a whole-time nurse available for general cases.
- (2) Infectious Diseases.—The services of a special nurse in certain specified cases of infectious diseases are available under arrangements made between the local and County Nursing Associations and the County Council.

(d) Treatment Centres and Clinics.

Persons suffering from venereal diseases are treated at Northampton General Hospital by arrangement with the County Public Health department.

The County Council is the authority for the treatment of Tuberculosis and the Tuberculosis Officer attends weekly at the Health Clinic, Market street, Kettering.

An Orthopædic Clinic is held in Kettering and children from Desborough may attend by arrangement with the County Public Health department.

Under the County Maternity and Child Welfare Scheme a Child Welfare Clinic is held fortnightly in Desborough. Extra accommodation for prams. has been provided.

(e) Hospitals

The following hospitals are available for inhabitants of Desborough:—

Kettering Infectious Diseases Joint Hospital.

Rushden House Sanatorium.

Kettering and District General Hospital.

London Road Public Assistance Hospital, Kettering

Leicester Royal Infirmary.

Northampton General Hospital.

Manfield Orthopædic Hospital.

(f) Contraceptive Clinic.

A contraceptive clinic is conducted by Dr. Mary Hendrie at the Infant Welfare Centre, Eyechurch Lane, Northampton, on the third and fourth Thursday in each month. Appointments can be made for the attendance of suitable cases on application to the Medical Officer of Health.

SECTIONS C and E.—Sanitary Circumstances of the Area and Inspection and Supervision of Food.

Report by Arthur Harris, M.I.M. & CY.E., A.R.S.I. Sanitary Inspector and Surveyor.

Water.

A full and sufficient supply was maintained throughout the year.

Samples of water taken for bacteriological examination were reported as being satisfactory.

The water mains were extended in Braybrooke Road to serve the new housing site and in Breakley's Road to meet the development taking place in this area.

Reference was made in the report of last year regarding the construction of a concrete water tower of 50,000 gallons capacity. This work together with the alterations of the water mains to form a high level zone has been completed. The plant is now well served with a good and constant supply. The improvement of the pressure in this zone has been greatly appreciated.

Drainage and Sewerage.

The Sewage Disposal Works have been well maintained and the effluent has been uniformly good.

Open Space, Gladstone Street.

During the year Dr. Gerald Gibbons of Rothwell offered a site in Gladstone Street and a sum of money to assist in its development as an open space, in memory of his father, Dr. H. Gibbons, who for many years was the esteemed Medical Officer of Health to the Council. The gift was gladly accepted and the site has now been laid out with flowering shrubs, seats, etc. The garden has beautified this part of the area and makes a very restful spot for the older inhabitants.

SANITARY INSPECTION OF THE AREA.

During the year 275 houses were inspected. The reasons for inspections were as follows:

House Inspections.			
Routine inspections made	under	the	
Housing Acts, etc.	• • •	•••	275
Infectious Diseases	•••	• • •	5

Factories and Workshops.

Two notices were served referring to insufficient and defective w.c.'s.

During the year the Medical Officer of Health inspected the following factories and workshops.

Boot factories	•••	•••	6
Corset factory	•••	•••	1
Rigid Container factor	ies	•••	2
Hand Cutting Machine	e factory	• • •	1
A C A			10

Rats and Mice Destruction Act.

The administration of the above Act again received full attention.

Poison baits laid were found to have been taken. A rat week was held and 486 rats were destroyed.

Eradication of Bed Bugs.

No action in this connection has been necessary.

Inspection and Supervision of Food.

Milk Supply.—One hundred and one samples of milk offered for sale were sent for bacteriological examination during the year. The results were as follows:

- (a) Eighty-three were good.
- (b) Eleven were moderate.
- (c) Seven were bad.

Slaughter-houses.—The three slaughter houses in the town were frequently inspected and were found to be maintained in a satisfactory condition.

No carcases were condemned.

Inspection of food.

The usual periodical inspections of food exposed for sale were made. On no occasion was it necessary to take any action.

Cowsheds.

One cowshed in the district has been improved during the year and provided with low mangers, modern tubular fittings and the floors and channels laid to meet present day requirements.

In previous years a report by the local veterinary inspector, Mr. Trevor Spencer, to the Joint Dairies and Cowsheds Committee has included Desborough Urban District—At the beginning of April, 1938, the inspection of cows contributing to the public milk supply was taken over by the Ministry of Agriculture and Fisheries, and Mr. Spencer was allocated a district which included part of the County not under the jurisdiction of the Kettering Committee. As there would be some difficulty in sorting out those which belong or do not belong to the area of the Joint Dairies Committee, it has been decided, this year, to omit a report from Mr. Trevor Spencer.

SECTION D .- Housing.

Twenty-six houses were built during 1938 by private enterprise. Twelve were erected by the Council.

- 1. Inspection of Dwelling-Houses during the year.

Housing Act, 1936—Overcrowding. 4. (1) (a) Number of dwellings overcrowded at end of year 12 (b) Number of families dwelling therein 12 Number of persons dwelling therein 94 (2)Number of new cases of overcrowding reported during the year NilNumber of cases of overcrowding (3) (a)relieved during the year 6 (b) Number of persons concerned in such 50 cases (4)Particulars of any cases in which dwelling houses have again become overcrowded after the local authority have taken steps for abatement of overcrowding NilAny other particulars with respect to (5)overcrowding conditions upon which the Medical Officer of Health may consider it desirable to report Nil

The Medical Officer of Health and the Sanitary Inspector were asked by the Council to make a survey of certain unsatisfactory houses in the district. This survey was carried out in the spring and 117 houses were visited. A special report on them was presented to the Council in June. Following consideration of this report the Council took action with regard to the worst of the houses, scheduled in Group I. The decision as to what procedure should be adopted with the remainder was deferred.

SECTION F.—Infectious Diseases.

The total number of cases of infectious diseases, excluding tuberculosis, notified during the year was 5. This figure shows a decrease of 2 on the number for 1937 and compares with 15 for 1936, 11 for 1935, 15 for 1934 and 6 for 1933.

An analysis of the notified cases appears in the following table:—

Infectious Cases Notified during 1938.

		AGE PERIODS						Total Cases							
NOTIFIABLE DISEASES	At all Ages	Under 1	1-2	2—3	9-4	4-5	5—10	10-15	1520	20-35	35-45	45-65	65 & cver	Removed to Hospital	Total Deaths
Smallpox															
Scarlet Fever	4			1	1		1	1						2	Nıl
Diphtheria													:		
Pneumonia															Nil
Enteric Fever including Paratyphoid Fever															Nil
Puerperal Pyrexia															
Erysipelas	1								1					1	Nil
Total	5			1	1		1	1	1					3	Nil

Smallpox.—No case of this disease occurred in the Urban District during 1938.

Scarlet Fever.—Four cases of scarlet fever were notified showing an increase of 1 on the number for the preceding year; two were removed to hospital. The remaining cases were nursed at home under favourable conditions.

The disease was of a mild type and there were no deaths.

Scarlet Fever antitoxin is available, free of charge, to practitioners, for the treatment of necessitous cases of scarlet fever,

Diphtheria.—No case was notified during the year.

Erysipelas.—One case was notified and removed to hospital.

Tuberculosis.—The following figures show the number of cases on the Tuberculosis Register at the end of 1938.

	MALES.	Females.	TOTAL.
Pulmonary Tuberculosis	12	9	21
Non-pulmonary Tuberculos	sis 5	1	6
	${ m To}$	tal Cases	27

One case of pulmonary tuberculosis was notified during 1938 as compared with 8 cases in the previous year.

Particulars of new cases and deaths from the disease are shown below

Tuberculosis.

New Cases and Mortality, 1938:—

	N	EW	CASE	S	DEATHS				
AGE PERIODS	Pulm	onary	No Pulm	onary	Pulm	onary	Non- Pulmonary		
	М.	F .	м.	F.	M	F.	м.	F.	
0— 1— 5— 15— 25— 35— 45— 55— 65—	1				1				
Totals	1				1				

The death-rate from all forms of tuberculosis per 1,000 population was 0.23 as compared with 0.45 for 1937; 1.59 for 1936; 0.91 for 1935 and 0.45 for 1934.

The occupation of the 1 case notified was that of shoe-operative.

Public Health (Prevention of Tuberculosis) Regulations, 1925. These regulations empower the Council to prevent persons suffering from tuberculosis from engaging in the milk trade. It was unnecessary to take action under these regulations during 1938.

Public Health Act, 1925, Section 62, and Public Health Act, 1936, Section 172. No action was taken under this section whereby an infectious case of pulmonary tuberculosis, which is a serious risk to others, may be compulsorily removed to hospital.
